

## Living Well with Dementia

A series of films by eHealth Digital Media in collaboration with: Cwm Taf Morgannwg University Health Board. Assistive Technologies Innovation Centre (UWTSD.) Swansea University's Centre for Innovative Aging, Teepa Snow and her Positive Approach to Care team.

The first of the series of dementia films introduces Pauline and Clive Jenkins and explains why we are sharing their experience of living with dementia.

We describe the series of ten films and give examples of what can be learnt from the expertise shared in each film.

The purpose of the series is to give carers and families an insight into a lived experience of dementia and build confidence to support others to live as well as possible with the condition.\_

Film topics - 1 Understanding, 2 Safety, 3 Truth, 4 Anger, 5 Visual perception, 6 Process, 7 Anxiety, 8 Sundowning, 9 Eating and drinking, 10 What's the point.
